Griswald Brooks
Senior Software Engineer
griswald.brooks@picknik.ai

Getting Started

```cpp
int main(int argc, char ** argv)
{
  rclcpp::init(argc, argv);

  auto node = std::make_shared<rclcpp::Node>("minimal_param_node");
  auto my_string = node->declare_parameter("my_string", "world");
  auto my_number = node->declare_parameter("my_number", 23);

  rclcpp::spin(node);
  rclcpp::shutdown();
}
```

30 lines of C++ boilderpate per parameter

30 lines of C++ boilderpate per parameter
Before handling of dynamic parameters
